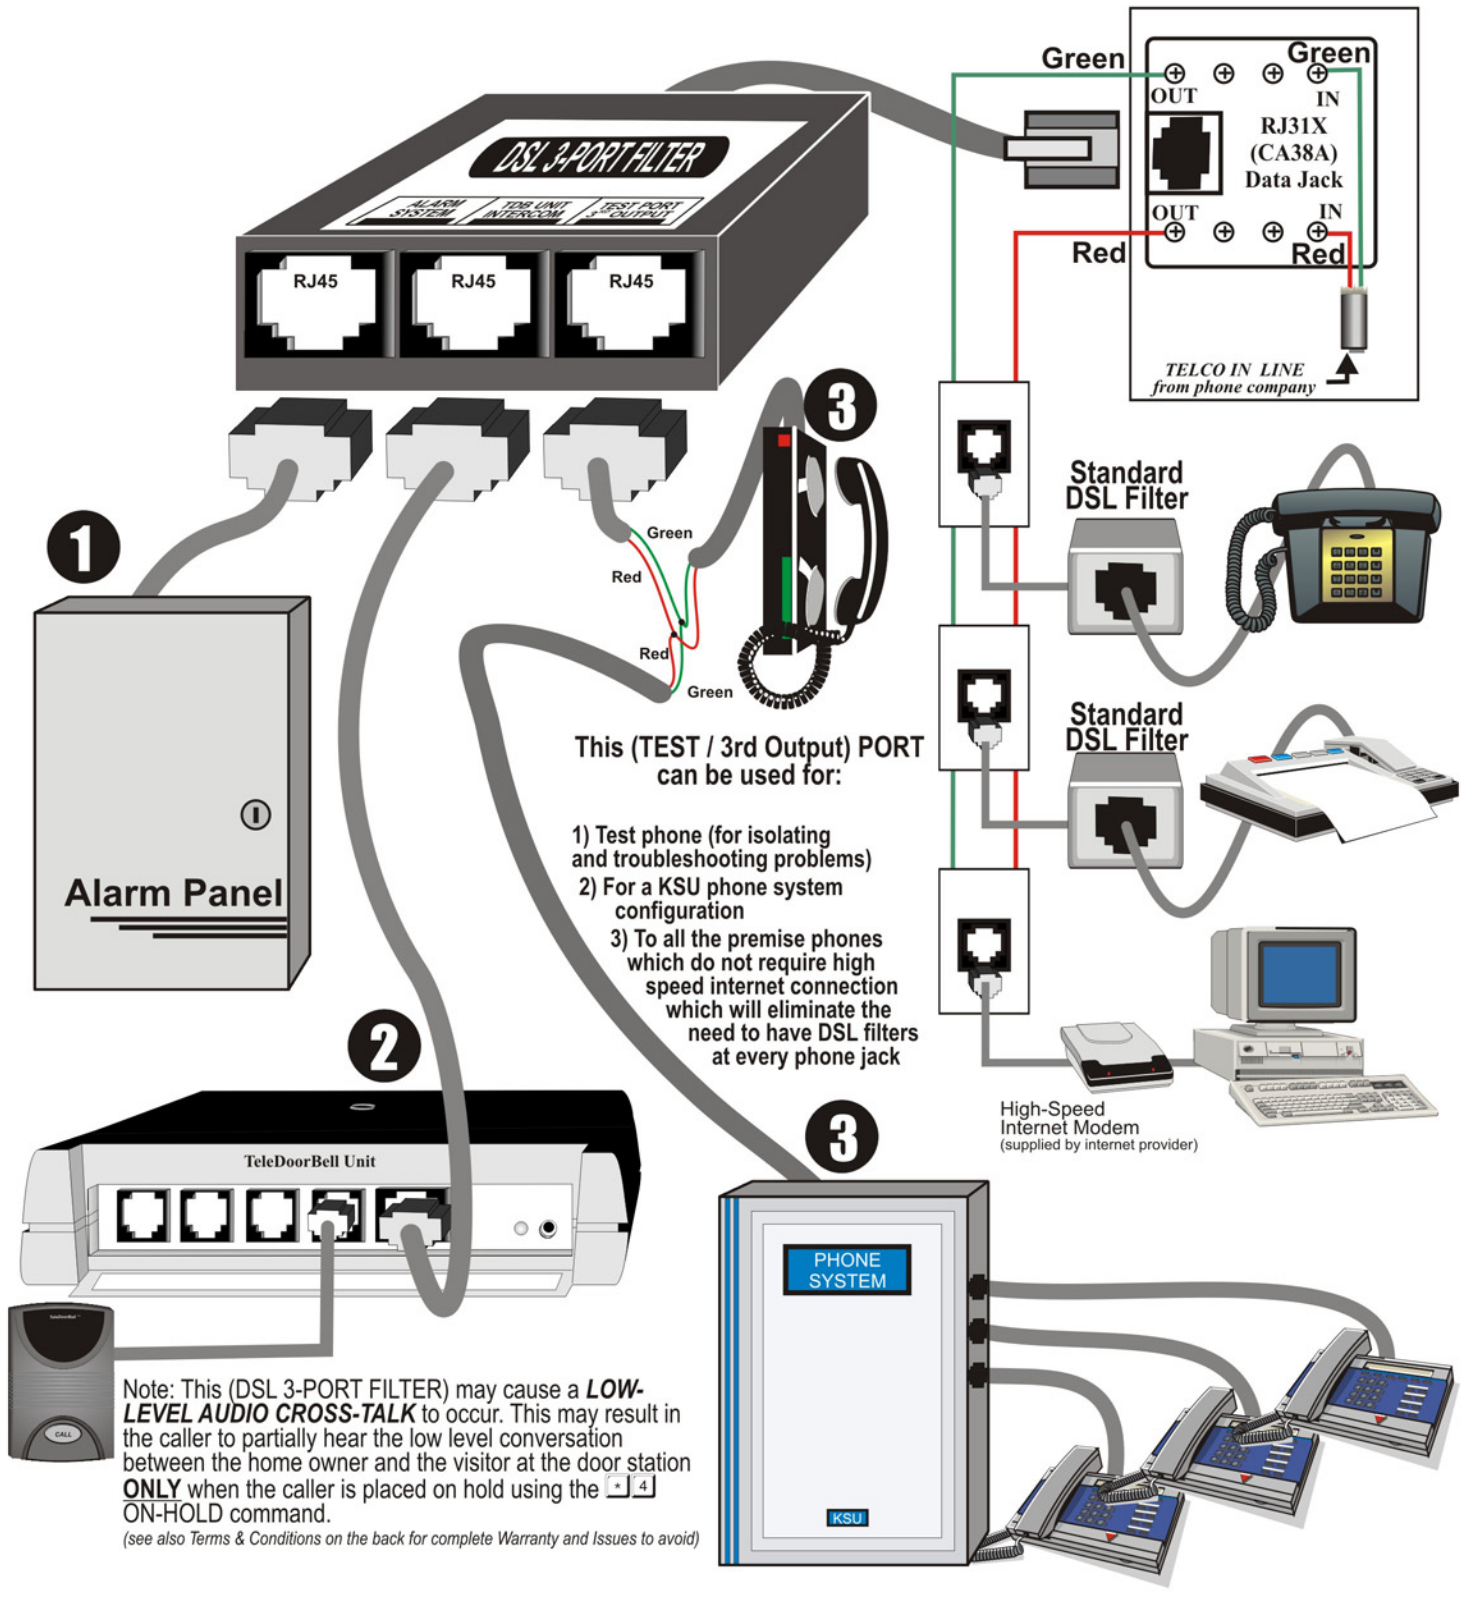
LOGENEX INNOVATIONS INC

DSL 3-PORT FILTER INSTALLATION DIAGRAM

19 KENVIEW BLVD UNIT31, BRAMPTON, ONTARIO L6T 5G6, CANADA



This (TEST / 3rd Output) PORT can be used for:

1) Test phone (for isolating and troubleshooting problems)
2) For a KSU phone system configuration
3) To all the premise phones which do not require high speed internet connection which will eliminate the need to have DSL filters at every phone jack

Note: This (DSL 3-PORT FILTER) may cause a ***LOW-LEVEL AUDIO CROSS-TALK*** to occur. This may result in the caller to partially hear the low level conversation between the home owner and the visitor at the door station **ONLY** when the caller is placed on hold using the *4 ON-HOLD command.

(see also Terms & Conditions on the back for complete Warranty and Issues to avoid)
