

More Than Just Security...

The Ultimate System

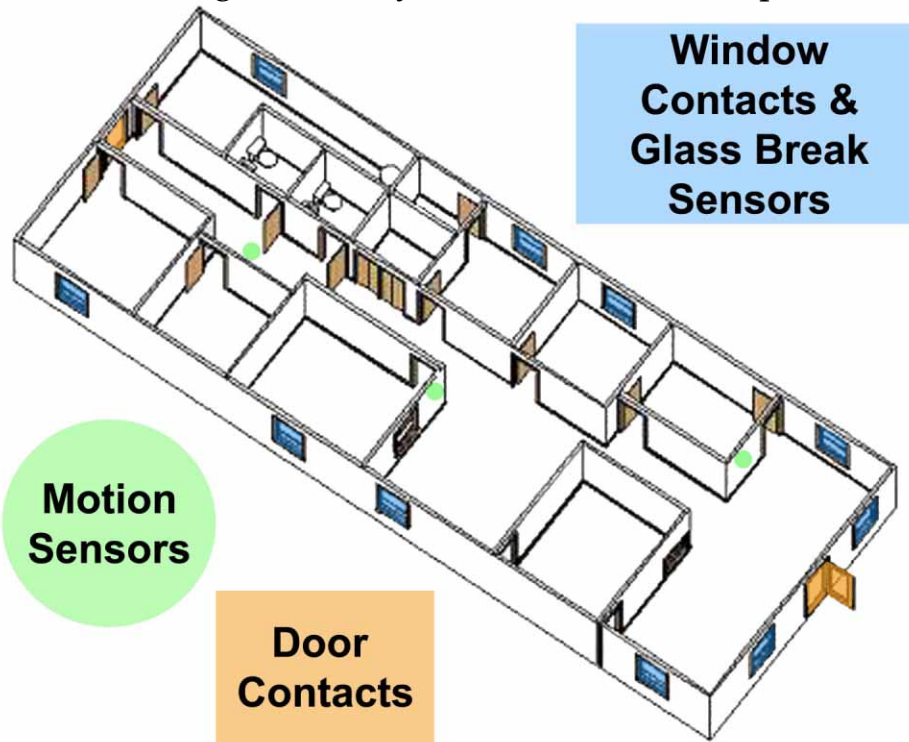

Protection and Peace of Mind

Elk's M1 systems are designed to provide the best in security, convenience, and energy management, as well as stress-free operation...

Because you have enough to worry about.

At the core of every M1 system is a rock solid security system.

Sensors placed throughout the building provide multiple levels of protection allowing the M1 System to detect and report intrusion.

- Expandable to meet your specific needs; monitor up to 208 different contacts or sensors.
- Supports multiple user codes; permanent codes for employees and staff, and temporary codes for guests, service persons, etc.

Security

Easy to use keypads allow complete control of your system

This keypad is backlit with adjustable intensity and extra large characters for improved readability. It features a built in temperature sensor and can display the date, time, and temperature. The fold down door has a magnetic closure and can be completely removed, if desired. Up to 16 keypads can be installed throughout the premise.

Large Display LCD Screen-
Displays system status, messages, reminders, etc. and guides you through the system menus

Quick Arming Keys-
Instant arming of security system

Easy to Use Navigation Keys-
Guides you through the easy to understand menus, giving you total control of your M1 system

Easily Bypass Zones
to temporarily exclude the zone from being monitored or detected by the system

Six (6) Programmable Function Keys-
Alert central station to an emergency: Police, Medical, or Fire and/or provide instant activation of tasks from an array of automation capabilities

Activate the Chime Feature
to alert you of door openings

Keypads

Easy to use keypads allow complete control of your system

Keypads

Convenient Arming Stations

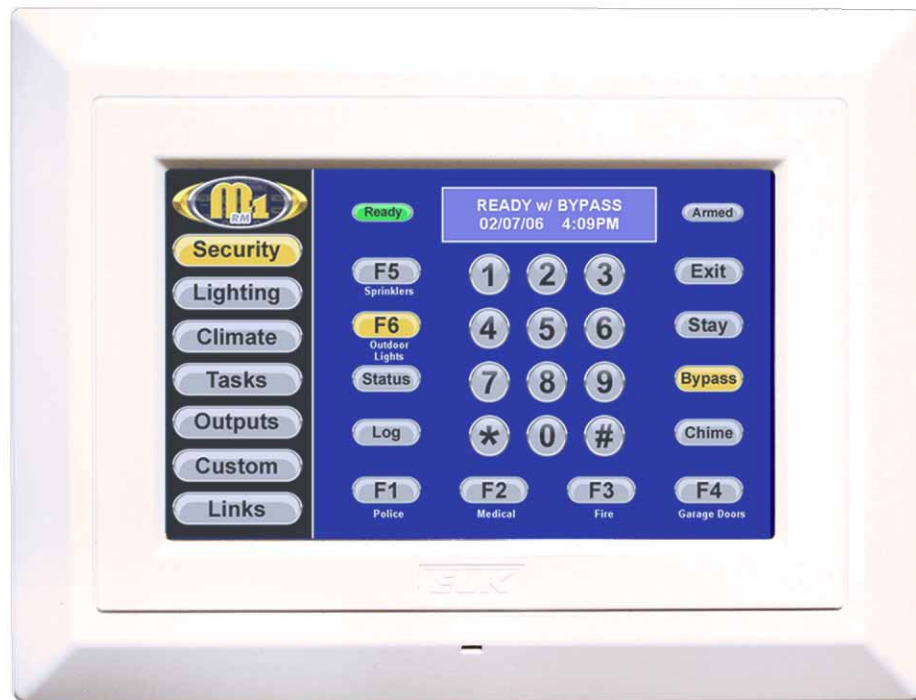

This "Light Switch" size keypad provides most of the functionality of larger keypads and is more economical. Up to 16 keypads can be installed throughout the premise.

Keypads

*Control is at your fingertips
with attractive, easy to use touchscreens*

Simplify control of security and automation with the touch of a finger. The 7" super bright display is easy to read and easy to use.

- Arm & Disarm Your System
- View the Event Log
- Control Lighting
- Adjust Climate and View Temperature Sensors
- Activate Tasks
- Turn devices On and Off
- Make Changes to Your Custom Settings
- View Cameras
- Control Whole House Audio

Touchscreens

Convenient Multi-Level Access Control

Allows different levels of access for each user

Activity log provides time, date, and user information.

Access the activity log from any system keypad or your PC.

No need to memorize access codes with convenient access cards and fobs.

Cards are the perfect size to be kept in a wallet or outside pocket of a purse.

The small, thin design of the keychain fobs won't make the keychain bulky!

Access Control

*Voice guides you through your system,
eliminating the guesswork*

A comforting voice guides you through the use of the system and advises status such as:

- A door has opened
- A water leak has been detected
- The temperature of an area or freezer is too high
- A door has been left open
- You have a visitor
- Etc...

If you are away, these messages can be delivered to your home phone, cell phone, co-worker's phone, etc.

Telephone Remote Control

Access and control your M1 system from any telephone, anywhere. Helpful voice prompts guide you through your system.

- Arm/Disarm Security System
- Control Lighting
- Adjust Climate Controls
- Turn Devices On/Off
- Activate Tasks
- Check System Status

Be Informed With Voice

Control your system from Any PC, Anywhere!

Remote Control via the Internet

View a secure, virtual keypad, then point and click your way through the entire system. Ensure that everything is secure and running smoothly; if not, make the desired changes.

Easy to use screens make controlling your system effortless, whether you are at the office or away!

- Arm/Disarm Security System
- Control Lighting
- Adjust Climate Controls
- Control Outputs
- Activate Tasks

Receive event notification and reminders via email!

Remote Control

*Easily control your system
from your PC or PDA*

Get total control of your system with easy to use, remote management software on your desktop and laptop computers. You can also control your system from your PDA.

Remote Management software allows you to:

- Arm & disarm your system
- View the event log
- Control lighting
- Adjust climate and view temperature sensors
- Activate tasks
- Turn devices on and off
- Make changes to custom settings
- Access your favorite websites
- View Cameras
- Control Whole House Audio

Remote Management

*Control lighting for security,
energy savings, and safety*

Save on energy bills by automatically
controlling lights and electrical devices based
on schedule or occupancy.

Provide timely lighting for
added employee safety

Deter burglars with
exterior lighting.

Lighting

*Climate control provides comfort,
convenience, and energy savings*

Our climate control features
give you all the flexibility
you need to ensure comfort,
while taking advantage of
energy savings.

M1 makes it easy to set
and forget your seasonal
preferences for climate!

Monitor critical temperatures
of environment or individual
equipment and receive alerts
of unsatisfactory readings

Climate Control

Eliminate False Alarms with Automatic Verbal Verification

False alarms waste the time of police, fire departments and emergency services. Business owners may be fined for false alarms in certain areas.

Audio verification
helps reduce costly
and embarrassing
false alarms.

Audio Verification is automatically activated by M1 when an alarm occurs allowing the monitoring station to speak with you to verify that there is an emergency.

Audio Verification

More Convenience, Less Mess

Wireless sensors can be installed with less mess in an existing building. Also great for adding to M1 system that is already installed.

Wireless keyfobs provide a convenient way to control your system

Arm/Disarm the Security System
Open/Close Overhead Doors

Turn On Exterior Lighting
Activate Panic Alarm
Etc...

Wireless

Relax...

While you are taking
care of business, know
that we are taking
care of your assets
